TECHNICAL SKILLS

Languages: Java, Python, Kotlin

Frameworks: JUnit, Mockito, Flask, FastAPI, gRPC, REST, GraphQL

Technologies: Git, Docker, Kafka, AWS, Jenkins, CircleCI, SQL, NoSQL

Familiar with: Kubernetes, Nomad, NodeJS, MongoDB, Ruby on Rails, Go

EXPERIENCE

Staff Software Engineer, Collaboration

Sep 2023 – Present

Procore Technologies

Portland, OR

- Building a Notifications Platform to provide a uniform org-wide approach to sending emails
- Built an in-house solution to power conversations on the Procore app; led the backend platform design and implementation
- Mentoring engineers on event modeling and event-driven methodologies, for decoupling from the existing monolith
- Part of an innersource initiative to improve developer experience, with a focus on increasing adoption of Kafka, Java, and Python across the organization

Senior Software Engineer, Conversations Platform

Jan 2023 – Aug 2023

Babylon Health

Austin, TX

- Built a conversations platform to allow for AI-supported live chat experience for members to get us closer to achieving our mission of providing accessible and affordable healthcare for all

Senior Software Engineer, Vrbo Communications Platform

Jan 2020 – Jan 2023

Expedia Group

Austin, TX

- Developed a cloud-native solution for interacting with the conversation platform, which was earlier served by legacy applications in a private data center, relying heavily on Kafka and Aurora MySQL while providing APIs via gRPC
- Designed and implemented a solution for wiping out customer data across the messaging ecosystem on request per GDPR guidelines, with Kafka as the underlying event stream

Software Engineer, Big Data Platform

Jan 2019 – Dec 2019

Vrbo, a part of Expedia Group

Austin, TX

- Contributed to Vrbo's open-source project, Stream Registry, a metadata store of Kafka streams
- Developed and maintained pipelines that enable replication and long-term retention of data from Kafka in various other data stores
- Designed and implemented Vrbo's customized offering of Jupyterhub as a Machine Learning platform for getting users federated access to compute resources on AWS for building and training models

Software Engineering Intern, Big Data Platform

May 2018 – Aug 2018

HomeAway (now Vrbo)

Austin, TX

- Set up a system for proactively anticipating and mitigating potential disruptions to HomeAway's stream platform and infrastructure
- Highlighted possible Kafka partition hot-spots by using probability distribution models
- Implemented a Python micro-service to analyze topics in Kafka clusters and provide a graphical visualization of the same via a topic manager UI

Technical Lead

Nov 2015 – Jun 2016

Alcatel-Lucent

Bangalore, India

- Feature engineer for Change Requests in the Platform Division of the Small Cells Business Line

Senior Engineer

Jun 2012 – Nov 2015

Comviva, a Tech Mahindra company

Bangalore, India

- Developed, maintained, and supported existing and new functionalities of SMSC/USSD software in C and C++

EDUCATION

Rochester Institute of Technology

Aug 2016 – Dec 2018

Master of Science in Computer Science

Rochester, NY

Manipal Institute of Technology

Jul 2008 – May 2012

Bachelor of Engineering in Electronics and Communication

Manipal, India
